

SELCOPHER

Vitamin E & Selenium

Vitamin E and Selenium are required to build the Immune system in the animal's bodies as they play a role as "Antioxidants".

Selenium deficiency in newborn calves leads to white muscle diseases and retains the placenta in newly calved cows. Vitamin E and Selenium play a major role in the treatment of mastitis as deficiency of any one of them may lead to an increased incidence of mastitis. Feeding of vitamin E may lead to a Newtropic activity to kill bacteria observed at calving.

Vitamin E required to maintain immune function prevents muscular dystrophy in young calves.

BENEFITS OF POULTRY:

- Prevents Exudate diathery and Encephalopathy. It acts as an anti-oxidant
- Relieves from stress and inactiveness.
- Improves hatchability, fertility etc. in breeders.
- Prevention of Selenium and Vitamin E deficiency such as Exudative Diathesis, Encephalomalacia, Degenerative myositis and Fatty Liver.
- Improves both humoral and cell mediated immunity.
- Birds become more active with better stamina to yield better performance.

DOSAGE:

Add 1 ml of the product in 20 litres of drinking water for poultry and the other animals (or) as advised by a veterinarian.

COMPOSITION: Each 1 kg. contains

Vitamin E	:	1,30,000 IU
Selenium	:	2000 mg

SHAKE WELL BEFORE USE

**AVOID DIRECT SUNLIGHT AND STORE IN
COOL & DARK PLACE.**
